## **NOTICE OF RVSA RESTRICTED ACCESS IN RESPONSE TO CORONAVIRUS (COVID-19)**

Effective March 20, 2020 until further notice

Despite the public health emergency we are facing, it is imperative that the RVSA treatment plant maintains operations on a continuous basis. As such, the overall health and safety of our plant operators is absolutely critical at this time.

To mitigate the spread of COVID-19, the following measures have been implemented to reduce unnecessary contact and exposure.

RVSA's operating and maintenance staff has been split into two teams which will be quarantined within the treatment plant for alternating two-week periods. Administrative and Management staff will be working remotely, and are available by phone or email as needed.

In addition, all contractor work within the facility has been restricted to essential construction and repairs only. Vendors and other visitors are not permitted to enter the plant unless they are determined critical to maintaining plant operations by an RVSA staff member. Meetings and visits that are not deemed essential shall be postponed or conducted via electronic means. If you are scheduled for an on-site visit, please communicate with your RVSA contact via phone or email to determine the status of your scheduled visit.

We appreciate your cooperation and hope that you and your families fare well throughout this trying event.
