The RVSA facility is an autonomous agency that owns and operates a trunk sewer system and a wastewater treatment facility in Rahway, New Jersey. RVSA is a “major source” of air pollution (as defined in N.J.A.C. 7:1C-1.5) and, as such, submittal of the air permit renewal application and air permit modification application for this RVSA RNG Project are subject to the recently adopted NJDEP regulations at N.J.A.C. 7:1C, et seq. (Environmental Justice). A copy of the Environmental Justice Impact Statement (EJIS) document is available at <https://dep.nj.gov/ej/ej-order-meetings/#1692212274883-ae4ec22b-bfdf> and includes a review and analysis of contributions to environmental and public health stressors in the area overburdened community pursuant to New Jersey Statutes Annotated (N.J.S.A.) 13:1D-157 et seq. (N.J.A.C. 7:1C, 2023).

In addition to the public information session to be held on Thursday, July 16, 2026 RVSA will accept written comments on the EJIS between May 16, 2026 and August 16, 2026 via email to EJIS@rahwayvalleysa.com or by mail to:

Rahway Valley Sewerage Authority
Attn: EJIS
1050 East Hazelwood Ave
Rahway, NJ 07065

The RVSA facility invites any and all persons to attend the public information session and engage with the facility at the hearing or via the comment period.

SUMMARY: The analysis contained in the EJIS support the findings that the air permit renewal and facility improvements, as described in the proposed RVSA RNG Project, would not change or disproportionately impact the existing adverse environmental and public health stressors in the overburdened community in the vicinity of The RVSA facility.
